- 1. The dest German covernment has taken all possible steps to fulfill the planned 1954 power program amounting to a capacity of 741 magazatts. It may be assumed, however, that a 140 magazatts production will not be realized, because of production difficulties which arose in machine factories. The difficulties were often small, but decicive for the fulfillment of the program.
- 2. During deptember 1954, some of the backlog was eliminated and some capacities were taken up by largor plants, as for instance, 12.5 megawatts by the power plant in Stalinstadt, 12.5 megawatts by the Regis plant in Calbe and 30 megawatts by the Elle plant.
